SUMMARY

I'm a Full Stack Developer skilled in React, Next.js, and Supabase. I build clean, responsive web interfaces and connect them with efficient backend systems. I enjoy creating modern web apps and turning Figma designs into smooth, functional user experiences.

PROJECTS

- **Portfolio Website** [Visit Project](#)
Tech Used: HTML, CSS, Bootstrap
What I Learned: I learned to create a responsive layout using Bootstrap, design clean UI, use components like navbar, cards, and understand how to build a UX portfolio structure.
 - **Ludo Game** [Visit Project](#)
Tech Used: HTML, CSS, JavaScript
What I Learned: I learned to build an interactive Ludo board, implement game rules using JavaScript, and manage multiple players with smooth turn-based logic.
 - **Simon Game** [Visit Project](#)
Tech Used: HTML, CSS, JavaScript
What I Learned: I learned to build an interactive Simon Game, implement color and sound sequences, manage user input, and apply game logic for matching patterns.
 - **Text Preprocessing Tool** [Visit Project](#)
Tech Used: React.js
What I Learned: I learned to clean and process text data, remove stop words, tokenize sentences, and prepare inputs for further analysis or machine learning.
 - **Expense Tracker** [Visit Project](#)
Tech Used: React.js
What I Learned: I learned to build a responsive expense tracker using React, manage user input, and display real-time balance and transaction history.
